

Ban the Kitchen Knives!

The time has come for all Forces for Good in the world – self-styled Humanitarian Organisations, NGOs, Noble Souls, Concerned Citizens, dubious Environmentalists, Peace Activists, the whole bunch – to join in a great and holy campaign to rid the Earth of the abominable, intolerable plague of kitchen knives.

The nefarious interests of cutlery manufacturers, in a dark alliance with the sellers of salami and cucumbers, have poisoned the whole world with these horrendous instruments. The situation has degenerated to the point, that each and every of our homes conceal dozens and dozens of them! The smallest and less dangerous kitchen knife has a blade several centimetres long, more than enough to inflict harm to innocent people! And, I shudder as I tell it, reliable witnesses report about having discovered knives with blades some 20cm, even 30cm long! And those are not, as it would seem logical to you and me as well-meaning persons, knives with blunt points and dull edges – nay, they are deliberately made sharp, sharp to the point of being able to cut! And our own housewives are willing accomplices in this global crime, and have the nerve of telling us, “if a knife isn’t sharp, it serves no purpose!”

The sad, intolerable truth is that every year, thousands and thousands, nay, millions of people all over the world fall victims to kitchen knives. It’s cuts of all possible shape and depth, terrible wounds, sliced fingers, blood all over the place... an horrible catalogue that is repeated day after day across the Planet. And, the victims are mostly women and children! And, I have even heard of cases, where kitchen knives were used to, shall I say it? deliberately stab people!

It’s time to stop this abomination! Let’s free our homes from this menace, lurking in our cupboards and drawers waiting for

the next victim! We must arrive, as soon as possible, at an international agreement that will forever ban the production, sale, possession, use and transfer of these instruments of death and pain!

Don’t listen to those who would object, “knives are but utensils to be used to prepare and consume food!” Don’t listen to them! It’s a big lie, quite obviously fabricated in some obscure centre of malignant power! And even if it were true, how they dare putting their egoistic considerations of convenience and practicality in cooking and eating, ahead of the untold suffering of millions and millions innocent victims?

I thus appeal to the European politicians, who in their unfathomable wisdom saw it fit to deprive our armed forces first of anti-personnel mines and now dispersion ammunition (while of course leaving such appliances in the hands of those, who know only too well how to use them), to raise and carry forward the glorious banner of the “Ban the Kitchen Knives!” campaign. As the best venue for the signature of the relevant Treaty, I would warmly recommend the insane asylum in Neverland.

The time to act is NOW. And, as soon as we have successfully eliminated the plague of kitchen knives, we’ll have to do something about scissors and so-called “safety” razor blades.

DOWN WITH LOGIC AND REASON!

LONG LIFE TO POLITICAL CORRECTNESS!

WE SHALL OVERCOME!
