START TOWING THE EASY WAY!

TWIN for all wheeled helicopters with a gross weight up to 60 t (132,270 lbs)
• Fully automatic engagement of the nose wheel in seconds
• Up to a week operating time before recharging
• Circumferential visibility due to remote control
• One device for all helicopters and aircraft with wheels
• Ready for operation on aircraft carriers

Want to learn more? Visit www.mototok.com/military and watch the video.

Also available: HELIMO for all skidded helicopters with a gross weight up to 6 t
60 t

No strap – no winch – no crawling under the Helicopter for mounting a towbar. Just drive the mototok towards the nose gear and push a button on the remote control. That’s it.
