The Future Combat Naval System 2035 in the multi domain operations

A report from the workshop to be held on July, 1st, in Rome. The event will see the Marina Militare (Italian Navy) to explain its own ideas about the Future Combat Naval System in the future multi domain operations.

RHIB: something more than a rigid hull inflatable boat

Today the RHIBs (Rigid Hull Inflatable Boat) are the most widely used multi-role vessels, having replaced, in addition to the service motor boats, the Rigid Raiding Craft and the Combat Rubber Raiding Craft (the real rubber dinghies). A long analysis of the technical solutions adopted on this variegated craft category.

The air defence systems

The short/medium range air defence systems are enjoying a new vogue everywhere in the world. Their operational doctrine and operation, however, is changed in comparison with the past. For

example, the modern systems not only provide the point defence to the forces on the battlefield, but also are able to provide the area defence against multi-layered threats, and often they are integrated into wider airspace control networks (national or local).

Interview with Adm. Cavo Dragone, Italian Navy's Chief of Staff

Our interview with Adm. Giuseppe Cavo Dragone, the Italian Navy Chief of Staff, deals with all the topics of interest for the Armed Service.

The strategic scenario and the Italian Navy role evolution are presented, together with the modernization efforts related to the new ships and equipment.

News from KMW

Report from our correspondent visiting the Kraus Maffei Wegmann Headquarters. The German company is working on different new projects, including a new generation AIFV, an additional upgrade package for the LEOPARD 2A7, and the latest evolutions of its 155 mm self-propelled gun.
